

Livernois Streetscape Update!

7/22/2019

The Livernois Streetscape Project is moving along! On Wednesday, July 24th between 6-9am your business may experience intermediate water service disruptions. The service disruptions should not last longer than 15-20 minutes.

Should you experience service disruption, running water may be colored or cloudy. Allowing the water to run until clear again is advised before use.

The City of Detroit understands this is not an easy process and we are sorry for any disturbance this will cause.

For any questions or comments please contact Gustavo Serratos or Pei Boayue at:
