

7 Tips to Clean Up

Flood Damage

**Need help
getting debris
out of your
home?**

Call 313-267-8000

1. Get rid of any dirty objects that cannot be thoroughly cleaned. (When in doubt, throw it out)

2. Wash dirty surfaces and objects with warm, soapy water & clean with a bleach and water solution.

3. Do not use ammonia. Ammonia mixed with bleach creates a gas that could be deadly.

4. Have the right safety gear like an N95 mask, heavy work gloves, rubber boots & gloves if sewage is involved.

5. Pace yourself, get help lifting heavy items and get support from family and friends.

6. Prevent mold by airing out your home, use fans to dry wet areas, open doors, and windows.

7. Remove and discard drywall and insulation that has been contaminated with sewage or flood waters.
